

Alejo Schlegel

Software developer.

ABOUT ME

Experienced software developer proficient in JavaScript and C#, with strong analytical skills and attention to detail. Collaborative team player with excellent communication skills committed to delivering high-quality, user-friendly software. Excited to join innovative development teams.

WORK EXPERIENCE

Terra, Bilbao — software developer

MAY 2024 - PRESENT

Primarily focused on backend development, delivering fast and efficient projects for clients using technologies like WordPress, PHP, Vue, GSAP, and HubSpot. Managed the entire backend almost independently for a major refactor of the company's website using Astro and React

Welbo, Amsterdam — social robot developer

APRIL 2023 - MAY 2024

I designed and developed cloud-based apps with React ensuring smooth interactions with robots and a dashboard app for managing robot operations, while utilizing RabbitMQ and Feathers for efficient microservices communication between services. I developed unit and integration tests and contributed to the development of an Android app with kotlin for controlling the robots, while maintaining and developing numerous chatbots using google cloud services.

Kenjo, Madrid — Javascript developer

JUNE 2022 - APRIL 2023

Played a key role in identifying and fixing bugs in Angular and React Native apps, developed a backoffice app to streamline processes, and managed data using AWS. Developed tests with Jest and scripts to manage data imports and maintain application reliability, contributing to improving software quality and performance.

Thinkion, Argentina — Tech Solutions Specialist

NOVEMBER 2020 - DECEMBER 2021

Handled customer inquiries and technical issues in databases and PHP programming, quickly diagnosing and efficiently resolving problems. Developed strong communication skills and appreciation for excellent customer service.

SKILLS

My communication, collaboration, adaptability, and attention to detail skills make me a valuable asset in any setting, allowing me to work effectively with others, tackle challenges, and produce high-quality work.

EDUCATION

Henry, United States — Full stack developer

DECEMBER 2021 - MARCH 2022

Acquired experience in JavaScript, HTML, CSS, Node, React, Redux, and SQL through this Academy.

UTN, Argentina — Advanced C# | Unity Video Game Programming Expert

JANUARY 2021 - JUNE 2021

Acquired advanced programming techniques and project management skills, allowing me to create engaging game experiences and took C# reinforcement courses after specialization in 2022.
